Alexandr Chekunkov - CV.

Android Developer

▼ 🐢 hard work pays off.

i had the privilege of working with many large Russian companies.

i am always ready to develop and improve my skills in what i like. i take great care in the experience, architecture, and code quality of the things i build.

---

languages and tools

- kotlin & java
- algorithms & data structures
- OOP principles & design patterns
- network technologies
- jira, bitbucket, confluence
- google services, firebase, sqlite, git

- android SDK
- jetpack, dagger 2, retrofit 2, room
- kotlin coroutines, kotlin flows
- junit, espresso, robolectric
- MVVM, solid, clean architecture
- rest API

---

about me

i graduated from school with a technical focus and entered RTU MIREA with a degree in "Information Systems and Technologies" in 2020. during my studies, i mastered a huge number of technologies and programming languages. the teaching staff described them as disciplined, responsible, hardworking and ambitious students.

in addition to basic training, i have successfully completed a large number of additional education courses (IT-School "Samsung", SberUniversity, etc.), where i acquired deep knowledge in the field of mobile development, security of mobile operating systems, IT architecture, etc. d.

by actively interacting with colleagues, i not only participated in improving the functionality, but also actively took part in supporting and resolving technical issues. i collaborated with designers, project managers and other developers to create great projects. i received high marks in the company, which confirm the quality of my work.

was involved in writing articles that were published on popular platforms:

- "Jetpack Compose Library for a Beginner Android Developer"
- "PostgreSQL, Spring Framework and Android for the novice developer"
- "Library "Room" for a beginner Android developer"
- "RecyclerView for a novice Android developer"

i have several completed projects developed for the Android OS and published in the Google Play Store application store.

---

career history

june 2023 - today   **SBER - *Android Developer***

- developed module responsible for CSI-pages in the mobile application "SBOL"
